SUBJECT INDEX

Aberration on Distortion Calibration and Operational Data Reduction, The Effects of Lateral Chromatic, 2
(An) Adaptive Prediction Filter, 29
Analysis, Laser Radar Performance, 94
Analysis of Optical Components and Systems at White Sands Missile Range, Testing and, 12
Analysis of Signature Models for Optical Sensor Discrimination, Graphic Methods for Analytic and Experimental, 21
Analytic and Experimental Analysis of Signature Models for Optical Sensor Discrimination, Graphic Methods for, 21
Application, Development of Laser Ranging Systems for Space, 151
Application of Laser Radar to Range Instrumentation, 123
Atmospheric Turbulence, Image Resolution through, 34
Auto-Tracking, Laser Tracking System—Single-Station Cinetheodolite Ranging and, 131

Boresight Correction—A Tutorial, Pattern Recognition and Real-Time, 156

Calibration and Operational Data Reduction, The Effects of Lateral Chromatic Aberration on Distortion, 2
Calibration and Practical Error Sources, Laser Ranging Systems, 118
Chromatic Aberration on Distortion Calibration and Operational Data Reduction, The Effects of Lateral, 2
Cinetheodolite Ranging and Auto-Tracking, Laser Tracking System—Single-Station, 131
Compression by Spline Approximation of the Input Signal Fourier-Transform, Data, 55
Conversion Program at White Sands Missile Range, Optical Data, 169
Correction—A Tutorial, Pattern Recognition and Real-Time Boresight, 156

Data Compression by Spline Approximation of the Input Signal Fourier-Transform, 55
Data Conversion Program at White Sands Missile Range, Optical, 169
Data Recording and Monitoring (SADRAM) System, Marine Environment Test Range Semi-Automatic, 38
Data Reduction, The Effects of Lateral Chromatic Aberration on Distortion Calibration and Operational, 2
Data Reduction—Turnaround Time, A Partial Solution to the Fourth-Dimension Problem in Digital, 45
Development of Laser Ranging Systems for Space Application, 151
Digital Data Reduction—Turnaround Time, A Partial Solution to the Fourth-Dimension Problem in, 45
Discrimination, Graphic Methods for Analytic and Experimental Analysis of Signature Models for Optical Sensor, 21
Distortion Calibration and Operational Data Reduction, The Effects of Lateral Chromatic Aberration on, 2

(The) Effects of Lateral Chromatic Aberration on Distortion Calibration and Operational Data Reduction, 2
Encoders, Installation and Maintenance of High Resolution Optical Shaft, 84
Environment Test Range Semi-Automatic Data Recording and Monitoring (SADRAM) System, Marine, 38
Error Sources, Laser Ranging Systems Calibration and Practical, 118
Experimental Analysis of Signature Models for Optical Sensor Discrimination, Graphic Methods for Analytic and, 21

Filter, An Adaptive Prediction, 29
Fluid Heads Fit in with Instrumentation, How the, 81
Fourier-Transform, Data Compression by Spline Approximation of the Input Signal, 55
Fourth-Dimension Problem in Digital Data Reduction—Turnaround Time, A Partial Solution to the, 45

Gate to Target and Reads V-Angle, TV Tracker Fits, 162
Graphic Methods for Analytic and Experimental Analysis of Signature Models for Optical Sensor Discrimination, 21

Heads Fit in with Instrumentation, How the Fluid, 81
How the Fluid Heads Fit in with Instrumentation, 81

Image Resolution through Atmospheric Turbulence, 34
Input Signal Fourier-Transform, Data Compression by Spline Approximation of the, 55
Installation and Maintenance of High Resolution Optical Shaft Encoders, 84
Instrumentation, Application of Laser Radar to Range, 123
Instrumentation, How the Fluid Heads Fit in with, 81

Laser Radar Performance Analysis, 94
Laser Radar to Range Instrumentation, Application of, 123
Laser Ranging System, Precision Long-Range, 140
Laser Ranging Systems Calibration and Practical Error Sources, 118
Laser Ranging Systems for Space Application, Development of, 151
Laser Tracking System—Single-Station Cinetheodolite Ranging and Auto-Tracking, 131
Lateral Chromatic Aberration on Distortion Calibration and Operational Data Reduction, The Effects of, 2
Long-Range Laser Ranging System, Precision, 140

Maintenance of High Resolution Optical Shaft Encoders, Installation and, 84
Marine Environment Test Range Semi-Automatic Data Recording and Monitoring (SADRAM) System, 38
Missile Range, Optical Data Conversion Program at White Sands, 169
Missile Range, Testing and Analysis of Optical Components and Systems at White Sands, 12
Models for Optical Sensor Discrimination, Graphic Methods for Analytic and Experimental Analysis of Signature, 21
Monitoring (SADRAM) System, Marine Environment Test Range Semi-Automatic Data Recording and, 38

Operational Data Reduction, The Effects of Lateral Chromatic Aberration on Distortion Calibration and, 2
Optical Components and Systems at White Sands Missile Range, Testing and Analysis of, 12
Optical Data Conversion Program at White Sands Missile Range, 169
Optical Sensor Discrimination, Graphic Methods for Analytic and Experimental Analysis of Signature Models for, 21
Optical Shaft Encoders, Installation and Maintenance of High Resolution, 84

(A) Partial Solution to the Fourth-Dimension Problem in Digital Data Reduction—Turnaround Time, 45
Pattern Recognition and Real-Time Boresight Correction—A Tutorial, 156
Performance Analysis, Laser Radar, 94
Precision Long-Range Laser Ranging System, 140
Prediction Filter, An Adaptive, 29
Program at White Sands Missile Range, Optical Data Conversion, 169

Radar Performance Analysis, Laser, 94
Radar to Range Instrumentation, Application of Laser, 123
Radot-Tracking Techniques, Super, 62
Range Instrumentation, Application of Laser Radar to, 123
Range Semi-Automatic Data Recording and Monitoring (SADRAM) System, Marine Environment Test, 38
Range, Testing and Analysis of Optical Components and Systems at White Sands Missile, 12
Ranging and Auto-Tracking, Laser Tracking System—Single-Station Cinetheodolite, 131
Ranging System, Precision Long-Range Laser, 140
Ranging Systems Calibration and Practical Error Sources, Laser, 118
Ranging Systems for Space Application, Development of Laser, 151
Real-Time Boresight Correction—A Tutorial, Pattern Recognition and, 156
Recognition and Real-Time Boresight Correction—A Tutorial, Pattern, 156
Recording and Monitoring (SADRAM) System, Marine Environment Test Range Semi-Automatic Data, 38
Reduction, The Effects of Lateral Chromatic Aberration on Distortion Calibration and Operational Data, 2
Reduction—Turnaround Time, A Partial Solution to the Fourth-Dimension Problem in Digital Data, 45
Resolution through Atmospheric Turbulence, Image, 34
Resolution Optical Shaft Encoders, Installation and Maintenance of High, 84

(SADRAM) System, Marine Environment Test Range Semi-Automatic Data Recording and Monitoring, 38
Semi-Automatic Data Recording and Monitoring (SADRAM) System, Marine Environment Test Range, 38
Sensor Discrimination, Graphic Methods for Analytic and Experimental Analysis of Signature Models for Optical, 21
Shaft Encoders, Installation and Maintenance of High Resolution Optical, 84
Signal Fourier-Transform, Data Compression by Spline Approximation of the Input, 55
Signature Models for Optical Sensor Discrimination, Graphic Methods for Analytic and Experimental Analysis of, 21
Single-Station Cinetheodolite Ranging and Auto-Tracking, Laser Tracking System—, 131
Sources, Laser Ranging Systems Calibration and Practical Error, 118
Space Application, Development of Laser Ranging Systems for, 151
Spline Approximation of the Input Signal Fourier-Transform, Data Compression by, 55
Super Radot-Tracking Techniques, 62

Target and Reads V-Angle, TV Tracker Fits Gate to, 162
Techniques, Super Radot-Tracking, 62
Testing and Analysis of Optical Components and Systems at White Sands Missile Range, 12
Test Range Semi-Automatic Data Recording and Monitoring (SADRAM) System, Marine Environment, 38
Tracker Fits Gate to Target and Reads V-Angle, TV, 162
Tracking System—Single-Station Cinetheodolite Ranging and Auto-Tracking, Laser, 131
Tracking Techniques, Super Radot-, 62
Turbulence, Image Resolution through Atmospheric, 34
Turnaround Time, A Partial Solution to the Fourth-Dimension Problem in Digital Data Reduction—, 45
TV Tracker Fits Gate to Target and Reads V-Angle, 162

V-Angle, TV Tracker Fits Gate to Target and Reads, 162

White Sands Missile Range, Optical Data Conversion Program at, 169
White Sands Missile Range, Testing and Analysis of Optical Components and Systems at, 12
